

SF Prep

by Satya Technologies · Technology by Dial N Search Pvt. Ltd.

For Schools · Class 1 to 12 · Any board or publisher

Your school's own books, turned into **practice tests** for every student.

SF Prep turns every chapter of the books your school teaches into chapter-wise practice, mock tests and daily practice, on the website and the Android app. **We onboard your books for you.** Teachers see exactly where each class needs help.

We onboard your books

Send us your book list. Our team adds every book and chapter, with questions, answers and explanations.

Teachers see the gaps

Each student's progress and the chapters a class gets wrong most, so revision goes where it is needed.

Students practise daily

Chapter tests from their own textbooks, instant results with solutions, streaks and leaderboards.

HOW IT WORKS

From your book list to students practising, in four steps

You do not need an IT team or any set-up. We build your school's digital practice around the books you already teach.

1

Share your book list

Class-wise list of the books you teach, for any board or publisher: NCERT, state board or private publishers.

2

We onboard every book

Our team adds each book chapter by chapter, with practice questions, correct answers and explanations. Many books are already live.

3

Your school portal is ready

Classes and sections are set up and the right books are assigned to each class, so every student sees only their own syllabus.

4

Students join in a minute

They scan your school's QR poster or enter the school code and sign in with WhatsApp. Their books appear automatically.

Our ecosystem: every book your school uses, on one platform

Our aim is to onboard **all** of your school's books, so every student, in every class, can test themselves on every subject they study.

BENEFITS FOR THE SCHOOL

Your own digital practice platform

Practice, tests and results for your school, without building or running anything.

Progress you can see

Class-wise and student-wise progress, and the weakest chapters, so results improve in a measurable way.

Works anywhere

On the website and the Android app, on any phone, at school or at home.

Exactly your syllabus

The school chooses the books for each class, so students practise what is taught in the classroom.

Healthy competition

School and class leaderboards and weekly badges keep students motivated to practise.

A modern school for parents

Show parents a digital learning system where their child practises regularly and can see their own progress.

Less checking for teachers, more practice for students

For teachers

A simple school portal, no training needed.

- ✓ **Classes and sections** set up in one place.
- ✓ **Choose the books** for each class.
- ✓ **Invite students** with a school code or a printable QR poster.
- ✓ **See each student's progress** and who is falling behind.
- ✓ **Weak chapters per class:** the chapters a class gets wrong most, so revision is targeted.
- ✓ **School and class leaderboards** to encourage regular practice.
- ✓ **Manage students:** move them between sections or remove them.
- ✓ **No paper checking:** tests are marked instantly with solutions.

For students

Practice from their own textbooks, on their phone.

- ✓ **Chapter-wise practice** from the exact books taught in class.
- ✓ **Chapter mock tests** with instant score, right answers and solutions.
- ✓ **Daily practice (DPP)** and streaks that build a study habit.
- ✓ **Mistake book:** wrong answers come back until they are learnt.
- ✓ **Results and progress:** score trend and subject and chapter analysis.
- ✓ **Hindi and English** where the book has both.
- ✓ **Bookmarks and own question sets** for revision before exams.
- ✓ **Free notes, daily current affairs and GK,** plus past papers for JEE, NEET and other exams for older students.

Useful from Class 1 to Class 12

Young students practise their textbooks chapter by chapter. Older students also get competitive-exam practice in the same app, so one platform grows with them.

LOGINS

A login for the school, for every teacher and for every student

School login

For the principal or school admin: one view of the whole school, with its classes, books, teachers and students.

Teacher login

For each teacher: their classes, students' progress, weak chapters and leaderboards.

Student login

Sign in with WhatsApp, no password to remember. The same account works on the website and the app.

We set up the logins with you when we onboard your school.

WHAT YOUR SCHOOL GETS

- All your school's books onboarded, chapter by chapter
- School portal with classes, sections and books per class
- QR poster and school code to invite students
- Chapter mocks, daily practice and a mistake book
- Website and Android app
- Practice questions with answers and explanations
- School, teacher and student logins
- Student progress and weak-chapter reports
- School and class leaderboards with weekly badges
- Support from our team

Let's onboard your school

Send us your class-wise book list and we will take it from there.
